J.J. Allaire
Software Engineer and Founder, RStudio

“BRINGING R AND RSTUDIO INTO THE CLASSROOM”

WEDNESDAY JULY 15, 2015
7-8:30 P.M.
103 McCONNELL HALL (AUDITORIUM)
SMITH COLLEGE CAMPUS

Sponsored by the HHMI Computational and Visualization Consortium

ABSTRACT

RStudio is an integrated development environment (IDE) for R that has become increasingly common as an environment for statistical analysis and statistical education. In this talk, RStudio founder J.J. Allaire will discuss new IDE features that make learning/using R more straightforward (code completion, code diagnostics, code snippets), review what R Markdown can do for teaching/homework, and preview some things coming in the next release that will help with teaching, including improvements to R Markdown authoring mode and Google Docs style real time collaboration. Please join us for what should be a stimulating discussion.
