Geology Internship - Pittsburgh, PA

Seneca Resources Corporation, the oil & gas exploration and production subsidiary of National Fuel and Gas Company (NYSE: NFG), is currently seeking a Geology Intern for its Marcellus Shale operations in Pennsylvania.

The Internship is for the Summer of 2012 and the intern will be working with our geology and geophysics groups in our Pittsburgh office.

The Geology Intern will serve as an integral member of the team with responsibilities including, but not limited to, the following:

- Update maps and analyze data used in the selection and planning of drilling locations
- Work with management, vendors and other employees to enhance new technologies related to natural gas exploration and production
- Interpret subsurface data to aid exploration and production projects
- Work as a member of a team to make recommendations that drive efficiency and reliability as part of a continuous improvement approach

The ideal candidate will be pursuing a Bachelor’s Degree in geology, geophysics, and/or petrophysics who have completed at least two years of their education. Proficiency in Microsoft Office is required. Candidate must be inquisitive, dependable, and have the ability to work both independently and as a part of a team in a fast-paced environment. The Geology Intern will be paid a competitive wage.

Candidates interested in this internship must refer to the job title, Geology Intern, or Job ID #12-12PA in their correspondence. For confidential consideration, please send your resume and cover letter by February 6, 2011 to jobs@srcx.com or to:
