EARLY RESEARCH PROJECT APPLICATION
Spring 2014

Directions:
1. Complete this form no later than Friday, January 31st and email it to the faculty member running the project you are interested in. Submit a separate form for each project to which you are applying. Be aware that projects get full! The sooner you apply, the more likely you are to find an available spot.
2. After you submit your application(s), the faculty member(s) running the projects will contact you to set up an interview time.
3. After your interview, it is up to you and the faculty member to determine whether you and the research project are a good fit for one another. If they are, then together you will decide how and when you will participate in the project.

Please note that the Science Center Committee on Diversity is providing you with this information, but all communication around applying for a research opportunity should be between you and the relevant faculty members.

PROJECT SELECTION

Please write the name of the faculty member whose project you are applying for, and briefly explain why you are interested in the project.

ACADEMIC INTERESTS AND BACKGROUND:

1. What are your main academic interest(s)?
2. What computer skills do you have?

3. What other background do you have that may be relevant to the project you selected?

4. What courses are you currently taking? What additional courses have you taken that you think have provided you with an appropriate background for your selected project?

5. (Optional) Please share any strong academic interests or skills which you have not already listed here.
