Applying for graduate school this year or thinking of options for the future?

Faculty and students will discuss relevant issues for STEM students in this discussion/workshop series.

In Part 1 of the 4-part workshop series we will:
- Learn how to find, choose and apply to graduate schools in your field
- Get info on taking the GRE
- Learn the best ways to ask for letters of recommendation

No RSVP needed but if you let aanacker@smith.edu know what field you are going into, we can try to ensure an expert from your area will be present.
